Summary and Recommendation

1. **Overall Churn Rate**
    - About **26.54% of customers have churned**, which is a significant proportion and indicates a need for stronger retention strategies.
2. **Demographics**
    - **Gender:** Churn is almost evenly split across male and female customers (both ~26%), meaning gender is **not a key driver of churn**.
    - **Senior Citizens:** Churn rate is **~41%** among senior citizens, compared to **~24%** for non-senior customers, making them a high-risk group.
3. **Tenure Effect**
    - Customers with a **tenure of 1–2 months churn at over 60%**, showing early-stage disengagement is a critical risk.
    - In contrast, customers with a **tenure greater than 2 years churn at less than 15%**, confirming long-tenure customers are highly loyal.
4. **Contract Type**
    - Customers on **month-to-month contracts churn at ~43%**, far higher than those with **one-year (~11%)** or **two-year (~3%)** contracts.
    - This shows contract length is a strong predictor of retention.

Key Business Insights

- **High-risk groups**: Senior Citizens (41%), short-tenure customers (60%+), and month-to-month contract holders (43%).
- **Low-risk groups**: Long-tenure customers (<15%) and long-term contract holders (3–11%).
- Gender is **not a differentiator**, but age, tenure, and contract type strongly influence churn.

Summary and Recommendation

Recommendations

1. **Onboarding & Early Engagement**
    - Introduce **welcome offers, loyalty points, or free add-ons** in the first 3 months to reduce the **60% churn risk among new customers**.
2. **Promote Long-Term Contracts**
    - Incentivize customers to move from month-to-month to longer-term contracts, as this can reduce churn risk from **43% → 11% or lower**.
3. **Senior Citizen Retention Programs**
    - Target senior citizens with **tailored plans, discounts, or premium support**, since they churn at **41% vs 24%** for others.
4. **Data-Driven Retention**
    - Deploy churn prediction models to **flag high-risk customers early** and run personalized retention campaigns.
